Brad/Matt – just making sure you have all of the information from OSRTI that followed our August meeting in St. Louis so we don't revisit issues with HQ that we've already resolved. If you don't have these types of updates and notes from Dan please let me know ASAP and I'll go through my emails and send to you.

**Subject:** RE: Action Item Check In

Lynn,

Here is updated information from OSRTI on West Lake:

- Attached are write-ups from OSRTI which we propose will close-out our input at this time on three of the work plans:
  - Chemical Treatment technologies
  - Excavation Depths and Volumes
  - Cover/cap Design alternatives
- Since we have not yet received the Partial Excavation Workplan, we are not yet providing any information on that workplan. We are ready to analyze and provide input when we receive the workplan.
- Dan already approved the workplans for Discount Rate and Cap Design workplans
  - Note: I need to follow up here and with you on the relationship between Dan's approval of the Cap Design workplan and the attachment on cap alternatives
- Dave B is planning to meet next week with USGS on the Groundwater analysis, subsequent to last week's conference call, and we will follow up with you after that.
- Amy Legare previously provided good examples of ARAR evaluation

Thus, I believe the only outstanding OSRTI action items are:

- Review the partial excavation workplan after we receive it

- Provide input on the groundwater analysis after meeting next week with USGS

I think all OSRTI's input on all other workplans can be considered complete, unless you request additional input. As we discussed, we are available to provide any additional technical input and support you request.

I will be out of the office tomorrow, but would be glad to discuss this with you on Monday or Tuesday.

Thanks – Dana

Dana Stalcup

**Hi All – Seems like this has been a long week! I thought I would check in on the action items we agreed on during our 9/17 meeting to make sure we are on track. I know Amy has sent the ARAR samples to Alyse already. Will the other items scheduled for tomorrow, 9/26 be ready? (or maybe some of this has been sent to R7 already and I just haven't caught up with it yet)**

## **To Do**

- Dave B provides directions to give PRP re: evaluation of

## **treatment technologies (9/26)**

- Doug A provides directions to give to PRP to consider when developing estimated **RIM volume** (including recent Phase I data) (9/26)
- Dave K take lead in reviewing **partial excavation workplan** – provide HQ comments to R7 (subject to receiving plans) (10/3)
- Doug / Dana lead to get R7 comments on cover workplan (9/26)
- Amy ~~suggest good examples of ARAR evaluation (9/26)~~
- GW Characterization – **Dave B comments on F&T Workplan after receive USGS Comments / Findings**
  - Verbally – not waiting on USGS report (10/3)
- OSRTI – Dana/Doug provide any outstanding comments on workplans (9/26)
- ~~Dan approves workplans for Discount Rate and Cap Design (9/18)~~

**On the Partial Excavation Workplan – I understand that we are still have not yet received that plan from Republic.**

**On the GW Fate & Transport Workplan Comments – Dave B anything I can do to help with coordination of additional calls? Or are you just chugging away on it and contacting Dan and Dave as needed?**

Thank you,

## **Lynn M. Slugantz**
